UOI

Transdisciplinary theme: How the World Works

Central Idea–Light and sound help us understand and interact with the world around us.

LOI 1 – Different sources of light and sound

LOI 2 – How light and sound travel and change

LOI 3 – How light and sound are used in our daily life

Light & Sound

1. What are light and sound?

- What is light and what is sound?
- How do light and sound help us in daily life?

2.What are the sources of light and sound?

- What are natural and man-made sources of light and sound?
- Which objects are luminous and non-luminous?
- Which sounds are pleasant and unpleasant?

3.How do light and sound work?

- How does light help us see objects?
- How is sound made and heard?

4.How do light and sound change?

- How does light pass through transparent, translucent, and opaque objects?
- How is a shadow formed?
- How can sounds change?

5. Why are light and sound important to our life?

- How do we use light and sound every day?
- How can we use light and sound safely and responsibly?

Research work

Integrated with: Library, Visual arts, Indian music, Western music, English

Computers

MS POWERPOINT

Animations: Exit, Emphasis, Motion

Animation effects: repeat, delay, sound, with previous

Design: Format background - picture from file, gradient fill

Exercises:

*Two objects enter simultaneously from opposite directions, wait for a few seconds, and then exit simultaneously in opposite directions.

*A garden scene was created using gradient fill and flowers, with the sun shining using the **Emphasis – Repeat** effect. A butterfly flew in using a **custom motion path**, paused briefly on a flower using **delay**, moved to another flower using motion paths, and then exited the slide using an **exit effect**.

*Students were asked to animate the **Earth's rotation and revolution around the Sun** without the teacher's help.

Art

Creating Decorative Kites from Scratch (Non-Functional)

(Design, cutting, assembling & surface decoration only)

Skills Learned

- Planning a design independently
- Measuring, cutting, folding and pasting with accuracy
- Understanding structure for **visual balance**, not flight
- Problem-solving during construction (shape, alignment)
- Advanced fine motor control

Concepts Connected

- Geometry: symmetry, shapes, proportion (Math)
- Design & aesthetics
- Craft construction techniques
- Decorative art traditions related to festivals

2. Simple Paper Quilling

Skills Learned

- Precision rolling and shaping
- Motif and pattern formation
- Focus and patience

Concepts Connected

- Shape transformation
- Texture and repetition

3. Simple Paper Quilling

Skills Learned

- Precision rolling and shaping
- Motif and pattern formation
- Focus and patience

Concepts Connected

- Shape transformation
- Texture and repetition

Indian Music

- Warm-up exercise (different types of sound)
